Future Professional Practice - A Step in the Right Direction

Enhance the transition to professional practice for students in Medicine, Nursing & Pharmacy

- Develop a national cross disciplinary network of educators
- Identify an electronic platform (ePortfolio) to record, track and measure/assess competencies and enable student reflection
- Pilot and evaluate the implementation of an ePortfolio
- Create placement resources for practice/clinical tutors and students to enhance clinical placement learning
- Develop shared competencies that will promote Inter Professional Learning (IPL)

Prepare students to serve the best interest of the patient by creating

- A motivated, confident, self-directed lifelong learner through continuing professional development (CPD) (ePortfolio)
- A more aware, effective inter professional communicator, collaborator and team worker
- A competent, knowledgeable, skillful, professional supported by developmental placement resources
- A repository of placement resources for tutors and students to enhance clinical placement learning

Sample Outputs

- Video recordings, interviews with patient & health care professionals
- Enhancing Communication
- Shared Competencies for IPL
- Placement Resources
- ePortfolios
